

Katie Stapleton

Webmaster

About me

I am a first year engineer at Pembroke, who would love to join the CUADC Committee as Webmaster! Before coming to Cambridge, I had stage managed in a small local theatre, and was really excited to get to put on shows with such talented people in great venues like the ADC!

Relevant Experience

- Rapidly learning coding skills as part of my degree
- Experience running an online blog on WordPress, and on Wix
- I know the website really well as it was a key way that I found out about theatre before I came to Cambridge - looking at the role guides, upcoming shows and meeting minutes
- I understand the workings of committees, from the sixth form leadership group which I chaired, and also a committee that put on residential weekend trips for young people.

If I was webmaster...

- I would work with producers to get more photos on the website so there is more detail for each show, and to act as record of all the amazing work.
- I also would like to add a gallery to inspire people to get involved by seeing a snapshots of shows. I think the visuals of theatre are really striking, and show how the rehearsals and tech came together. This is important to be included on the website!
- I would also be particularly excited to get involved with freshers week and freshers plays!

Theatre credits include

- DSM for Blue Stockings
- Backstage crew for Tick Tick Boom, Panto and Chess
- Floor Manager for Sunday in the Park with George
