What I want to do

Currently, the membership website and database is kindly run by Charlie Jonas (2017-18 Webmaster) because no one from the CUADC committee ever took it back over nor had the ability to.

I hope to, with my not-yet-existent compsci powers and Charlie's help, try my best to understand how it works and work towards eventually having the website and DB entirely maintained by whoever is the current CUADC Webmaster.

This probably isn't something that can be done within my term in the committee, but getting it going would hopefully help future membership secs/Webmaster eventually achieve the goal. As a start, I will be able to help with unsubscribing requests from the mailing lists.

Oh and of course, making sure all the existing membership admin jobs get done.

Tl;dr: make sure existing stuff works, and work towards making it better

About me

2nd year CompSci at Churchill.

Usually does stage management stuff, mostly DSMing these days because I can sit on a chair. Also does a bit of lights.

Fig.1: QR code to my camdrum page for a full list of credits

I was Webmaster last year on the committee and I think I did 20% of the things I wrote on my manifesto (I know, I am sorry) so this year I'm going to be more realistic and

ACTUALLY MAKE SURE I DO WHAT I PROMISED HERE
